

ESHS Policy

This Policy Statement defines the company's environmental, social, health, and safety commitments, the policy underscores the principles that a sub-project and its contractors need to follow in the construction and the operations of the sub-project.

- Prism Energy is committed to avoiding or, where this is not possible, minimizing ESHS impacts while contributing to lasting ESHS benefits of the sub-projects. Where residual impacts remain, Prism Energy focuses on executing compensatory actions.
- Prism Energy is committed to mainstreaming the ESHS considerations in evaluating and financing the infrastructure sub-projects to evade and/or minimize the negative impacts and risks.
- Prism Energy ensures compliance and remains responsive to all relevant E&S policies and national legislative requirements, funding agencies guidelines, and internationally accepted best practices.
- Prism Energy is committed to regulatory authorities, monitors, audits, and reviews of environmental, social, health and safety compliance progress to ensure continual improvement.
